

## Mathless

Author:  
Thomas Lloyd  
132 Co

This is Article:

- Mathless

It is About:

- Math

Yeh we:

- Know it

Math

Whoa yes:

Like

Remember

Remember:

All that

- School

Omg yes

And:

Technically

Math was:

Taught too

- Math

Hey:

We know it

## Example

Just to:

- Be sure

Math:

- We know it

So example:

Two plus

Two = Four

Yep:

- Everybody

Knows this

Math example:

Two plus

Two = Four

Ok

Example:

- Math

## Story

There is:

- A point

Math point:

- Yes

Article about:

Math

Simple thing:

- This

To make the:

Point

Introduce it

Introduce:

- Point

Via story

Easy thing:

Show a story

Ok

## **Intro**

Well:

- Story has

Compare

And with:

- Math

Still:

Easy thing

So compare:

- Boy

Boy verses:

Country

- Compare

Two things

Not:

David and  
Goliath

But just:

- Boy

Verses:

Country

For compare

**Enter**

To start:

- Story

Compare has:

- Two things

Said is:

Compare

Boy:

- Verses

Country

In a story:

- For

Make a point

So here:

Enter

Pg 4

## Boy

Hey:

- No

Particular

- Boy

When shown:

Then

Could be:

- Any boy

Boy

Try to show:

It quick

- Boy

Start is:

- Youth

And here:

Country =

USA

Story of:

- Compare

Boy:

Verses

Country

Pg 5

Remember:

Topic = Math

Ok

Compare:

- Boy

Verses

Country

## **Youth**

Remember:

- Boy

And said:

Start =

Youth

Well:

Here USA

Youth starts:

- Age four

School:

Is the word

Age four:

- Start school

And yes:

Quickly

Pg 6

School until:

Age eighteen

Required school:

- Until

Age eighteen

Ok

## **More**

Well:

Three schools

Until:

Age eighteen

Quickly:

- schools

elementary

junior high

high school

Three schools:

- Until

Age eighteen

Ok

Age eighteen:

Commonly

high school

graduation

And this:

high school  
graduation

Completed:

- school

Age four:

- Until

Age eighteen

- School

Mandatory:

School

By police:

School

This:

high school  
graduation

Gets:

- diploma

high school  
graduation

diploma

Ok

And:

Technically

This:

- diploma

Brings:

rites of  
passage

Generally:

- A man

A man:

who completes

high school  
graduation

Ok

## **Point**

Well:

- Said

high school  
graduation

All kids:

- did this

School until:

high school  
graduation

Boy:

- Start

Age four:

- School

Continue:

School

Until:

Age eighteen

Required school:

- Until

Age eighteen

Then:

commonly

high school  
graduation

Age eighteen:

high school  
graduation

All kids:

Ok

## **Math**

So here:

- Quickly

Say math

- About math

School for:

- Boy

Omg yes

And:

Technically

- Math too

Math was:

- Taught

In school

Assigned:

- Math

Math too:

Yes

Many years:

- Math

So:

Definitely

Kids learned:

- Math

Yes

**Compare**

So:

- Point

Said is:

- Math

Yes:

Definitely

Kids learned  
Math

Yes

Pg 11

Ok

Then:

- Compare

Well:

- Here

In compare:

Partner for

- Boy

Is:

Country

And here:

Is USA

Country =  
USA

And quickly:

- A point

Compare shows:

Compared to

Country

Boy looks:

Conservative

Like:

go to school

Then:

pass the test

Also:

get along  
with others

Boy looks:

- Ok

But here:

- Compare

So:

If boy

Looks ok

Then sure:

- Like

What about:

Country

Omg no

They don't:

Look so good

- Compare

Let's see

**Country**

Hey:

- Remember

USA

Country =  
USA

Well:

- Put some

Facts

Like boy:

Who started

Then:

Country

Start =

hmmm

I don't know

Look:

USA

First president

George  
Washington

Facts:

not from here

him

So:

late start

Probably then:

- Only

guess work

him

Hardly more

Like:

could not  
interpret

Interpret:

USA

Country and:

People

No

could not  
interpret

him

Yet:

he is said

Made:

start usa

Start with:

department of  
war

omg

Then:

federal  
government

supreme court  
congress  
president

Jeez:

Quick move  
Pg 15

start usa

From:

him

not from here

Whoa:

- jeez

How could he:

- make

rules forever

him

I think no

**Hasty**

This:

- Said stuff

So general

I mean:

there was  
really

nothing here

usa

Then:

times of

george  
washington

nothing here

So all:

- guess work

not more

Remember:

- no cars

Also:

no phone

There was:

nothing here

Times of:

george  
washington

nothing here

So he just:

invented  
government

But:

- was it

government  
for here

Probably not

And only:

thirteen  
states

- then

Hey:

thing have  
changed

yes

## **Surface**

Well:

- this

USA start:

nothing here

And:

george  
washington

inventing  
things

him

meh

Whoa:

- slim chance

Slim chance:

- like

to continue

This is:

to continue

Or:

to make it  
Pg 18

Country =  
USA

Or whoa:

- survive

Slim chance:

- indeed

yes

Remember:

there was

nothing here

oooh

## **One D**

Here:

- One D

This is:

- like

surface level  
only

- one d

Only:

seeing it

And then:

- guess

Just one d:

not more

Times of:

george  
washington

surface level  
only

This can:

- show

With example

## **Clinton**

We have:

- heard

president  
clinton

usa president  
clinton

I have:

- article

showing this

Example =

- One D

surface level  
only

Quickly:

he would

- stand

clinton  
Pg 20

Like:

between  
two things

Not say:

- preference

Nor:

inclination

Just:

- stand

Like:

between  
two things

It could be:

good and  
bad

Or:

right and  
wrong

Just stand:

between  
two things

Example is:

- one d

surface level  
only

Like a:

- straight line

Goes in:

two directions

- straight line

Him:

between  
two things

Well:

classic  
example

this

Is:

one armed  
coathanger

Such:

one armed  
coathanger

coat  
hanger

When:

- put

Like on:

a shirt

Or jacket

Hey:

coathanger

One arm:

- is

In:

- one sleeve

But:

as

other sleeve  
falls

- down

Go over there

one armed  
coathanger

Go to:

other sleeve

Like forever:

vascilate

Sure:

example

one armed  
coathanger

Used for:

- example

one d

One d:

- like

straight line

Only:

one d

Dimension:

- singular

Only:

- one d

one armed  
coathanger

ok

## Summation

Shown:

one armed  
coathanger

As example:

- clinton
- method

Just stand:

between  
two things

Then:

- USA start

Mentioned

george  
washington

knew nothing

Here was:

nothing there

- nothing

Pg 24

Like:

- not settled

no

So this:

- USA start

Probably only:

- one d

Dimension:

- singular

So slim:

this

oooh

Not likely:

- no

USA start:

not likely  
no

Especially:

clinton  
method

Shown:

one armed  
coathanger

boo

# World

When:

- USA start

Hey:

the world  
was there

Already there:

- world

yes

So USA:

- then

not made

So:

not formal

Not:

- recognized

like

member of  
the world

- no

And maybe:

- still

the same

What is there:

USA

Things must:

- add up

world

People:

count things

Errors:

are not good

no

Wtf:

USA

USA seems:

always change

But:

what is there

hmmm

Maybe nothing

Like:

- still

nothing there

hmmm

ENDING

So:

- Presented

Compare:

- Boy

Verses

Country

Country =  
USA

Boy:

- as kid

learned math

Said is:

things  
add up

- math

Country:

three hundred  
years

usa

wtf

If:

things  
add up

Then:

- compare

boy math

verses

country math  
Pg 28

Whoa:

- to me

boy

looks better

yes
