This is Article:

- Snake

It is About:

- An idea

An idea:

Like

A snake

Not a:

Real snake
But

Just an idea

Idea of a:

- Snake

The reason:

- Is

Process

Similar is:

Method

Like how:

A snake
Would

Do something

When:

Seeing it

Then

- We see why

Write about:

- A snake

Method is:

The way

He

Would

Do something

- Method

Definition

First:

- To see

What is:

- A snake

Probably:

Most people

Know

A snake

What a:

- Snake is

Yet:

- Definition

To be sure

Ok

A snake:

First of all

Not common

Not too:

- Often

To see a:

Snake

Yet:

- Definition

To see:

- Method

Remember:

A snake

Using method:

- Continues

He:

Moves along

And said is:

- Process

As he:

Does things

Like his:

- Way

Pg 3

There is a:

- Process

So:

- Definition

Can help

Makeup

By:

- Description

A snake:

- Limbless

Like:

No arms

Also:

Legless

A snake:

Like a
Lizard

Called a:

- Reptile

Body is:

- Long

Shape is:

Cylindrical

Like a tube
Pg 4

They:

- Slither along

Wiggle on:

The ground

Snake can't:

- Fly

No

Snake would:

Slither along

On the ground

And go:

- From

Place to place

A snake

Jaws

He is:

- Known

For jaws

Snake jaws:

- Are strong

Main point:

About jaws

Snake may:

- Have fangs

Two strong:

- Teeth

Fangs

And most:

People

Know it

Most people:

- Know

Have heard:

About

Snake jaws

Snake jaws:

Are strong

Main point:

About jaws

Snake may:

- Have fangs

Two strong:

- Teeth

Fangs

Venom

This:

- Venom

Is poison

Snake may:

- Have fangs

These fangs:

- Used

For bite

And snake:

Bite

Not only:

- Teeth

Fangs:

Of snake

May have:

- Venom

Poison:

- Venom

So snake:

Bite

Is famous:

- For

Venom

He may:

Inject venom

If:

Snake bites

Pg 7

These are:

- Main points

About snake

Description:

Including
Fangs

Is the snake

Also:

- Remember

Venom

If:

Snake bites

He may:

Inject venom

Snake bite

Ok

Types

Quickly:

- Snake types

What I mean:

- Is

Snake:

We have
Heard of

By example

Snake type:

- Like

Common:

- Known

We know:

Cobra

Whoa:

Rattlesnake
Too

Omg:

- Still

Boa

And Python

We have
Heard of

- These

Whoa:

- Yes

Btw:

Constrictors

May:

Squeeze their
Prey

While:

Cobras
and
Rattlesnakes

No

Some have:

- Fangs

Like to bite

Oooh

Story

So a:

- Snake

May have:

- Venom

In teeth:

Fangs

He may:

Have venom

And such:

- Type

Poisonous

- May bite

We have:

Heard

Of bite

Name =

- Snake bite

Ouch

People:

Say this

Ouch

If:

Snake bites

Ouch

So here:

- Small point

If snake:

Has venom

And if:

Snake bites

Like a:

- Person

Then we:

Would see

- Process

From snake:

First

Appearing

And then:

- Continue to

Snake bite

We would:

- See

Progression

This is:

- Process

Like develop

Process

First:

- Snake

Would appear

He would

Be there

Remember:

- Reason is

To see

Process:

- Like develop

We could say:

Action

Steps in:

The action

We would:

- See

Progression

This is:

Process

Of

- Snake action

Like develop

Soon:

We can
Wonder

- About this

Ok

Picture

Well:

- If snake

Is there

And then:

- Does action

We would
See process

Develop action:

By steps

Usually:

- Snake

Would not
Bite

Without reason

But if:

Snake would
Bite

Perhaps:

- We

May see him

Then clear:

- Process

His steps:

In action

This is:

- Picture

Snake action:

Step by step

- Process

Develop

Of:

- Action

By snake

Point

Well:

- Said

Is picture

Idea of:

Snake is

There

If we:

- See snake

Then:

- More

If he:

Goes

Into action

That is more

Steps:

- Of action

Develop

So:

- Point

When snake:

- Appears

Picture

Then he:

Goes

Into action

Even:

All the way

Then is:

- This

Developed

Action:

- With steps

Is this:

- Still

Same picture

As

Snake

First seen:

- First appears

Me:

- I think no

So point is:

When snake

Goes into:

- Action

Snake action:

- Develops

Maybe this:

Changes it

Changes the:

- Picture

Snake:

- First appear

And then:

Does action

Is it the:

Same picture

Like:

- First seen

First appears

Me:

- I think no

Example

Let's see:

- Example

A guy:

- Example

If guy:

Is there

Then snake:

- Is there

If snake:

Goes into

Action

And then:

- Does bite

For some:

- Reason

Does bite

Then guy:

Called person

Pg 17

- Gets hit

Description =

- Snake bite

Well:

- Point is

If snake:

- Bites

And then:

Venom goes

In

Like:

- Hits guy

Like:

Takes effect

I think:

- It can

Influence guy

Not just:

- Still

Same picture

Like only:

Snake is

There

No

Effect

If guy:

- Person

Gets bit

It can:

Affect
Perception

Affect:

feeling
vision
general
perception

Probably true

The effect:

- Of snake

Snake bite

- Can matter

Can influence:

- Guy

It can:

Affect
Perception

Dimension

Well:

- What size

Affect
Perception

Look:

If snake
First appears

Like:

First picture

- Appears

Then:

Snake goes
Into action

And also:

- Bites

Plus if:

Venom
Goes in

And venom:

- Takes effect

Whoa

It can:

Affect
Perception

- Sure

Dimension is:

Snake
At first

Appearing:

- Can be

Only One D

Straight line:

- One D

Only one D:

One
Dimension

This perhaps:

- Possible

But:

- Later

Like:

After action

After snake:

Would bite

And guy:

- Affected

Maybe not:

Just one D

Maybe not:

Only one D

Like first:

- Picture

Snake appears:

Maybe just
One D

Ok
Pg 21

But later:

- Action

And developed

Whoa:

- Maybe not

Just one D

Especially if:

- Guy

Is affected

When guy:

- Gets high

Venom has:

Effect

Effect on him

Whoa:

His experience

Not the same:

- No

Is his:

- Experience

Still:

Only one D

Or is it:

- Two D

Pg 22

Much more:

- Happens

Process:

Snake action

Progression:

Steps there

Snake action

Whoa:

Maybe not

Just

- One D

No

One D

Quick:

- Definition

One D

And then:

- Two D

Quick

One D =

- Straight line

This:

Extending

Two directions

Pg 23

Infinitely

And also:

No thickness

One D:

- Straight line

This:

Straight line

Does not:

- Intersect

Other lines

Alone and:

- Single

Straight line

Two D =

- A line

That:

Intersects

With

- Other lines

Example is:

Circle

Triangle

Square

In these:

- Intersect

Line
Intersects

With:

Other lines

Ok

Definition:

One D

And two D

Ok

Main Point

Reason:

- For article

So here:

Simple picture

Can be:

- One D

Only one D

Perhaps
Possible

Ok

But:

- Action

with steps

And:

- Develop

Like linked

Method:

- With steps

Process:

Moves in
Progression

Step by step:

- Action

Built:

- Develop

Maybe not:

Only one D

One dimension

Single:

Straight line
Only

- Maybe not

Simple point:

- And

Extra

Extra

Additional:

- Point

If this:

- Is true

Snake bite

- Brings on

Altered
Experience

And so:

Is actually
Two D

Not just
One D

Well:

- What about

Government
Actions

Jeez

When we:

- See

Government
Actions

Do:

Government
Actions

Run so clean:

- That

They are:

Only one D

- Singular

Simple
Pg 27

Clean and:

- Done

Hmm:

I don't know

Do these:

- Actions

Stay:

Only one D

Linear:

- And perfect

Like:

- Untouched

Hmmm

Like:

Without
Blemish

Oooh

Look:

- One D

Straight
And linear

Is one thing

But:

Two D
Definition

Says

- Intersect

Intersect:

- With

Other lines

Circle

Triangle

Square

Do:

Government

Actions

Run so clean

That they:

Never

Intersect

- With others

Hmmm

Do these:

- Actions

Never cross

Another line

Oooh:

They complete

But clean:

I don't know

I think:

- Slim chance

Pg 29

Are these:

- Actions

Only one D:

Simple
Clean

Or are they:

- More

Like:

- Two D

Intersect:

With others

Maybe not:

- Absolute

So clean:

- And

Perfect

- No

We saw:

- Example

Article is:

Snake
